## FOREWORD

This preliminary report has been prepared for review and comment on the completeness, accuracy, and utility of the information contained herein. The report will be distributed to cognizant State building regulatory agencies, State delegates of the National Conference of States on Building Codes and Standards, Inc. (NCSBCS), the model building code organizations, industry and other sectors of the building community.

The information presented in this report is not necessarily complete in its coverage of all the States and municipalities nor is it to be construed as being accurate or current in all aspects. The background data was collected from various sources over an extensive period of time.

The final report will reflect the corrections and additions offered by reviewers. Your timely critique and suggestions on the format, content, and utility of the preliminary report are solicited. Responses should be directed to:

A Preliminary Examination of Building Regulations  
Adopted by the States and Major Cities

1. Purpose and Scope

The primary objective of this preliminary report is to provide a compilation and summary of pertinent data on various aspects of State and major city building regulatory programs which will be useful to State and local building officials, to Delegates and committee members of the National Conference of States on Building Codes and Standards, Inc. (NCSBCS), and to various other segments of the building community.

This preliminary report is intended to present in a reasonably uniform manner a series of summary tables which describe the overall complex of regulatory codes and standards bearing on building construction and occupancy which have been adopted by the various States and certain major cities. The report deals specifically with the status of Statewide regulatory programs and the respective codes which have been adopted in the areas of building,<sup>1</sup> mechanical, plumbing, electrical, fire and life safety, elevators, gas fittings, and boiler and pressure vessels. Coverage of other aspects of State adopted regulations such as energy conservation, elimination of architectural barriers to the physically handicapped, housing, health, noise abatement and historic preservation are also treated in less detail. Information available for presentation on municipal building regulations is limited to identification of the building, mechanical, plumbing, and electrical codes for the thirty cities that make up the membership of the Association of Major City Building Officials (AMCBO).

The summary descriptions are in the form of tables which incorporate information obtained from survey questionnaires and various other sources bearing on the subject of building regulation. Because of the rapid changes in the building regulatory field at both the State and local level, the actual status of the tabulated data may be changed by the time of publication. Also, States are introducing new legislation continually, and some laws providing for specific regulatory programs may have been enacted which are not reported herein. For this reason, key State officials and their respective administrative agencies are identified by address and telephone number in order that latest details on individual States may be obtained directly.

---

<sup>1</sup>There is an unfortunate problem with the meaning of the word "building" in this context. "Building code," for purposes of this report, refers primarily to only the structural aspects of construction, alteration, and use of buildings and not the installation of mechanical, plumbing, and electrical systems and equipment. This arrangement differs from other implied descriptions which perceive the "building code" as being all-encompassing. It is recognized, however, that some jurisdictions do utilize such composite building codes.

Based on feedback information received from regulatory agencies, it is intended to update and reissue the tables in final form in the future. Accordingly, any corrections, additions, and suggestions that would update and/or improve the format, content, and utility of the tables are solicited and should be sent to:

## 2. Background

While the Constitution gives police power to the States, the enactment, administration, and enforcement of building codes and regulations has traditionally been a function of local government in the United States. There have been, however, an increasing number of programs and activities at both the State and Federal levels of government which have a direct impact on building codes and the regulation of various forms of building construction. These range from the adoption of various types of State-wide building regulatory programs in a number of States to the promulgation of mandatory Federal Mobile Home Construction and Safety Standards.

Despite developments at the State level toward code uniformity within individual States and advances in the performance approach for establishing building requirements, the form and content of building regulations as well as the attendant administration and enforcement activities vary widely from municipality to municipality and from State to State.

There are today approximately 14,000 individual communities in the United States issuing building permits on the basis of authorizing construction within their corporate boundaries. Many of these jurisdictions have rules and regulations related to buildings but they may not be comprehensive building codes covering all aspects of construction and occupancy. Some jurisdictions are actually using only a fire prevention code to regulate building construction.

The trend of enacting Statewide building code programs has helped reduce the variety of building-related codes toward a more workable number; however, significant variations still exist because of the structure of the various State programs as well as the resources individual States provide for such efforts. The approach taken in existing State programs may be one of the following:

- enforcement of mandatory Statewide codes with no jurisdictional exceptions
- promulgation of one of the State or model codes that may or may not be adopted by the political subdivisions of the State (with various possibilities of allowing or disallowing local modifications to the promulgated code)

- promulgation of mandatory codes that exclude buildings to be used for certain occupancies; e.g., one- and two-family dwellings, agricultural buildings, etc.
- promulgation of codes that apply only to construction of State-owned buildings or those financed with public funds
- promulgation of codes applicable to a single occupancy group
- promulgation of minimum Statewide codes that may be exceeded by local jurisdictions

At the State level, enforcement of building regulations, particularly those activities dealing with plan evaluation, approval and field inspection, is inconsistent. Much of the effort depends on the State-local interface. Most of the programs are administered at the State level with the actual enforcement activities being carried out by local jurisdictions. State functions often include code development and promulgation, training, certification of inspectors and for some codes plan approval for certain classes of buildings. Also, administration of specialized codes; i.e., plumbing, mechanical, etc., is sometimes dispersed among a number of different State agencies.

### 3. Format and Content of Summary Tables

The summary data are presented in tables, as well as maps (figures 1 thru 9), which graphically depict the extent of coverage for the various regulatory programs in effect. Figure 1 gives combined information with respect to overall code coverage for both States and the major cities.

### 1 State Programs

Table 1 provides an overview with respect to the general status, preemptive application and technical basis for each regulatory program adopted at the State level.

Table series 2.0 through 9.0 provide the detailed information for each code category. Within each detailed table, the information is organized in the following format:

- Enabling legislation
- Application and type of code
- Occupancy classification covered
- Code amendment procedures
- Administration and enforcement agencies
- Availability of regulations

Appropriate notes and general remarks for each set of tables are also provided to further clarify the tabularized information. It should be pointed out that a number of States did not respond when the information for this report was collected. In these cases, the entry "No Statewide Code Adopted" is indicated on the tables.

### 3.2 Major City Programs

Tables 10 and 11 provide general information on the codes that have been promulgated in thirty municipalities in the areas of building, mechanical, plumbing and electrical regulation.

Specific parts may be purchased separately.

COLORADO

1. The "Multiple-Dwelling Code of the State of Colorado" (H.B. 1055, 1970, otherwise known as the "Colorado Housing Act of 1970") applies to all multiple-family structures, hotels, and motels in those areas where building codes are not otherwise enforced.

CONNECTICUT

1. Code amendments are provided to code holders only.

TABLE 2 STATEWIDE BUILDING CODE PROGRAMS (continued)

DELAWARE

FLORIDA

1. Florida has initiated the first step of a two phase program in the implementation of a minimum state building code. As of January 1, 1975, local governments and state agencies with building construction regulation responsibilities, that did not have in effect codes regulating the construction of buildings, were required to adopt the State Interim Building Code to regulate all types of construction. The State Minimum Building Codes were to be effective on a date set by the Legislature which was to be no later than January 1, 1977. However, due to the lack of State funding in 1976 the effective date has been postponed and the Interim Building Codes remain in effect.
2. For the State Interim Building Code - Local governments were required to adopt one of the following: State Building Code, Basic Building Code, Uniform Building Code, National Building Code, EPCOT (Experimental Prototype City of Tomorrow) Code, South Florida Building Code and the One and Two Family Dwelling Code. If the One- and Two- Family Dwelling Code is used then one of the other recognized model codes must be adopted for regulation of other residential and non-residential structures.

GEORGIA

1. Extent adopted is unknown.

HAWAII

IDAHO

1. Effective date is 1-1-76.
2. Exemptions are agricultural buildings, structures for industrial chemical plants and mineral extraction, temporary facilities used for construction, and telecommunications facilities.

ILLINOIS

INDIANA

1. The State Fire Marshal Department is adopting and enforcing UBC Chapters 33, 38, 40 and 42 and added provisions for alarms and facilities for the handicapped. Also, the federally required NFPA 101 is applied to all institutional buildings. All buildings and structures, except Farm Service Buildings, are regulated by A.B.C. and Fire Marshal Codes, but the One- and Two- Family Dwelling Code is enforced only by local officials for on-site work. Central plan review requires submittal to A.B.C. of at least two sets of documents.

TABLE 2 STATEWIDE BUILDING CODE PROGRAMS (continued)

INDIANA (continued)

1. One Indiana booklet contains amendments to the UBC and another the amendments to the One- and Two- Family Dwelling Code.

IOWA

1. Code is mandatory for state-owned buildings and factory-built structures.
2. Code is adopted by 7 cities and 1 county.
3. Reference to State Building Code document, Section 104A.

KANSAS

1. Enforcement of code is the responsibility of State Fire Marshal, 211 West 7th St., Topeka, Kansas 66603, (telephone 913-296-3401).

KENTUCKY

1. Incorporates by reference the National Building Code, 1967 Edition, to regulate fire and panic aspects of construction.

LOUISIANA

MAINE

1. Maine reports to have an Act, adopted 10/69, to authorize municipalities to incorporate by reference the provisions of nationally known technical codes prepared by State or regional agencies.

MARYLAND

1. Code is adopted by only 1 county as of 6/75.
2. Maryland Codes Administrative Regulations only.

MASSACHUSETTS

1. Basic Code significantly modified (Articles 4, 7, 12, 19 - altered or additions made; Articles 15, 16, 17 - deleted). Also the One- and Two Family Dwelling Code with significant modifications.
2. Legislative action possible to preempt code.

MICHIGAN

1. The law permits a city, village, or township to exempt itself providing it adopts by ordinance a nationally recognized model code. Most communities have elected to stay with the state Code (Basic modified) while some have adopted Basic directly and others the UBC.
2. Michigan General Rules including amendments to the Basic Code.

TABLE 2 STATEWIDE BUILDING CODE PROGRAMS (continued)

MINNESOTA

1. Code exceptions apply to farm dwellings, agricultural buildings, and municipalities not having standards as of July 1, 1972.
2. Enforcement of code is responsibility of local municipalities throughout State.
3. Amendments \$1.56.

MISSISSIPPI

1. The State Building Commission has adopted, as a matter of policy, that the Standard Building Code (SBCC) be followed in the design of public construction throughout the State that comes under its jurisdiction.

MISSOURI

1. The Division of Design and Construction uses the Basic Building Code in the design and construction of State facilities throughout Missouri.

MONTANA

1. Also use the One- and Two- Family Dwelling Code.

NEBRASKA

NEVADA

1. The Nevada State Public Works Board enforces the Uniform Building Code in all State building construction and capitol improvement projects. Also, the UBC is the code most widely in use throughout the State in the larger populated cities and counties.

NEW HAMPSHIRE

NEW JERSEY

1. New Jersey Uniform Construction Code Regulations relate to Administration and Enforcement and Building, Plumbing, Electrical and Fire Protection Subcodes.

NEW MEXICO

1. Amendments to the 1973 UBC.

NEW YORK

1. The 642 municipalities include 54 cities, 277 towns, 311 villages (77% of municipalities over 5000 population).

TABLE 2 STATEWIDE BUILDING CODE PROGRAMS (continued)

NEW YORK (continued)

2. Administration of code is municipal responsibility as per local law or ordinance.
3. Enforcement is responsibility of municipalities.

NORTH CAROLINA

1. One- and Two- Family Dwellings are covered by the North Carolina Uniform Residential Building Code. It is a mandatory maximum/minimum and can be amended by local governments only with State approval.

NORTH DAKOTA

OHIO

1. Factory-built of closed construction regulated for all occupancies by state certification, inspection and labeling. Mobile homes permitted as single family dwellings only. MH and RV 3rd party certified, state monitored.
2. Agricultural buildings incident to land use excluded. Federal buildings owned by and used for a function of Federal Government excluded.
3. Ohio also has a voluntary 1, 2 and 3 family Model Dwelling House Code for voluntary adoption. It may be amended locally without State approval. It was adopted in 1972 and its cost is \$6.00.

OKLAHOMA

1. The National Building Code (1967 Edition) has been promulgated by the State Fire Marshal Commission to regulate life safety aspects. Cities that have capability to enforce may adopt any of the four model codes.

OREGON

PENNSYLVANIA

RHODE ISLAND

1. The One- and Two- Family Dwelling Code is also used.

SOUTH CAROLINA

1. State law H2730 established a Building Code Council to promote uniformity and promote the adoption of the Standard Building Code (SBCC) by local jurisdictions.

TABLE 2 STATEWIDE BUILDING CODE PROGRAMS (continued)

SOUTH DAKOTA

TENNESSEE

TEXAS

UTAH

VERMONT

1. Act 196 of the 1973 Adjourned session stipulates that if a municipality does adopt a building code, it must adopt the National Building Code.

VIRGINIA

1. No local amendments.
2. Chapter 6 - Code of Virginia - Uniform Statewide Building Code Article 1 - General Provisions - Sec. 36-97 through 36-107, Article 2 Board of State Building Code Technical Review-Sec. 36-108 through 36-119. 16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.)  Preliminary information describing regulatory codes and standards bearing on building construction and occupancy which have been adopted by the various States and certain major cities in the U.S. are presented in a series of summary tables. The tables and accompanying notes provide information on salient elements of the enabling legislation, the type of codes and standards promulgated, and the respective agencies charged with the administration and enforcement of each regulatory program. Other features of the various regulatory programs (e.g., occupancy classifications covered, preemptive status of codes, etc.) are also enumerated. The regulatory programs and the respective code disciplines which are summarized include: building; mechanical; plumbing; electrical; fire and life safety; elevators; gas fittings; and boiler and pressure vessels.
